

# LOCAL EXTRA -TERRESTRIAL PHENOMENA

PHILIP YANCEY

FIG. A

In 2010 the power of the Arlington House transmitter, responsible for much of Margate's extraterrestrial activity, was boosted by this scaffolding, erected on July 8 (Fig a). While it remained, there was spike in UFO visits.

I am still unsure whether the building was designed specifically to be a beacon to aliens or if it just stands at the chance cross section of energy lines. (Trapped solar flare on floor 7?) Either way this scaffolding is acting like some kind of booster for the signals sent by Arlington House.

Perhaps the aliens are drawn in by accident; Arlington House might be

messing up their navigation systems like a reverse lighthouse or like that whale that swam up the Thames because a boat's propeller was too noisy/sounded like its mate. (?)

In 2005 I took a photo of Arlington House and when it came back from the developers you could see the signal. The wave was shaped like overcooked spaghetti and meatballs. (Fig. 2)

Arlington house was built in 1963 (Year of the Bogle-Chandler poisoning- Bogle was a physicist [A smell of rotten fish.] Connected?).
